

# Brick lane

## DINING TABLES

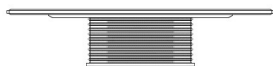

Majestic and imposing, Brick Lane dining table is characterized by the presence of ropes, visible through the wide glass top placed on the wooden base. The rope, a typical decoration of the classical world, is combined with brass elements to create a special graphic game that recalls the shape and materials of the hussar jackets. A style detail recounting the ability of Gianfranco Ferré Home to translate the classic style archetypes in a modern version, creating "a-temporal" furnishings carriers of a universal language able to seduce customers coming from different cultures and lifestyles.

Dining table with wooden structure in black lacquered finishing with decorative ropes. Glass top. Details in bronzed finishing.
